Draw Your Own Leprechaun & Color it!

Tip: If you choose a standard piece of copy paper, you can create a leprechaun mask with this tutorial. Glue design onto craft paper, cut out some or all of the face section and put your own face in it. Secure on either side with 2 elastic bands behind your ears.

How to draw a Leprechaun

1. Start in the middle and draw a horizontal line. This is the bottom of the hat/top of face.
2. Draw a long 1/2 circle to become the face.
3. Make a squiggle line on the outside of it to mimic a beard.
4. Leave face blank to cut out as a mask, or draw in a face. Make sure you have a smiley face and add bushy eye brows.
5. Give him some chin hair too.
6. Draw 3 lines parallel to your first line.
7. In the middle of the top 2 lines, draw 2 squares inside each other.
8. Place a dome shape on top.
9. Draw the flap of the hat like a saucer and link it to the hat section.
10. To finish things off give him a nice bow tie: draw a rough little square below his beard. Add a roughly drawn triangle on either side.

There is your Leprechaun! Easy enough!!
